Laminate Flooring

— Super Waterproof

- Waterproof
- Anti-scratch
- Environmental Friendly
- Easy click installation
- Easy clean

SUPER WATER-PROOF

With new technology, the laminate flooring is becoming super waterproof, that solved the biggest problem of traditional laminate flooring, this new product would help the family more beautiful, and be very welcome. Allows you get a stable and durable laminate flooring for the hallways, kitchens, and other easy wet areas.

Why is it waterproof?

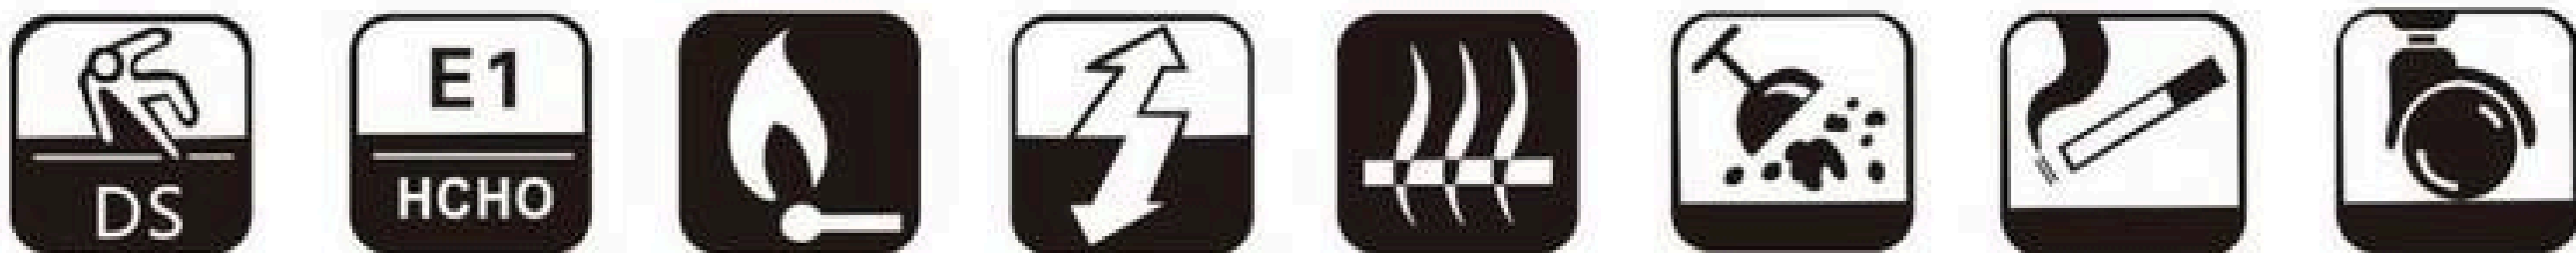

Its thickness swelling is <4% after 48hours in water.

Tested by the authority :

	Thickness Swelling (%)
New	<4% after 48hours in water
Traditional	<18% after 24hours in water

The lower thickness swelling value, the better.

Super waterproof laminate flooring is also eco friendly, the high density board is Carb standard, which its formaldehyde emission is $\leq 0.11\text{ppm}/\text{M}^3$. its more safe for your comfortable home.

Laminate Flooring

— Herringbone Design

- Zig-zagging pattern bring movement to your room, making it appear larger.
- Easy to clean, slip resistant, and high quality for heavy domestic and commercial usage.
- Easy to install, “left” and “right” sides has different box, easy to take them seperately.
- With painted bevelled edges, that give you distinctive V-groove.
- Has an amazing 20 year wear guarantee.
- Its warming tones and tactile woodgraining gives you the stunning good looks of a real wood floor.

SPC Flooring

— EIR Surface

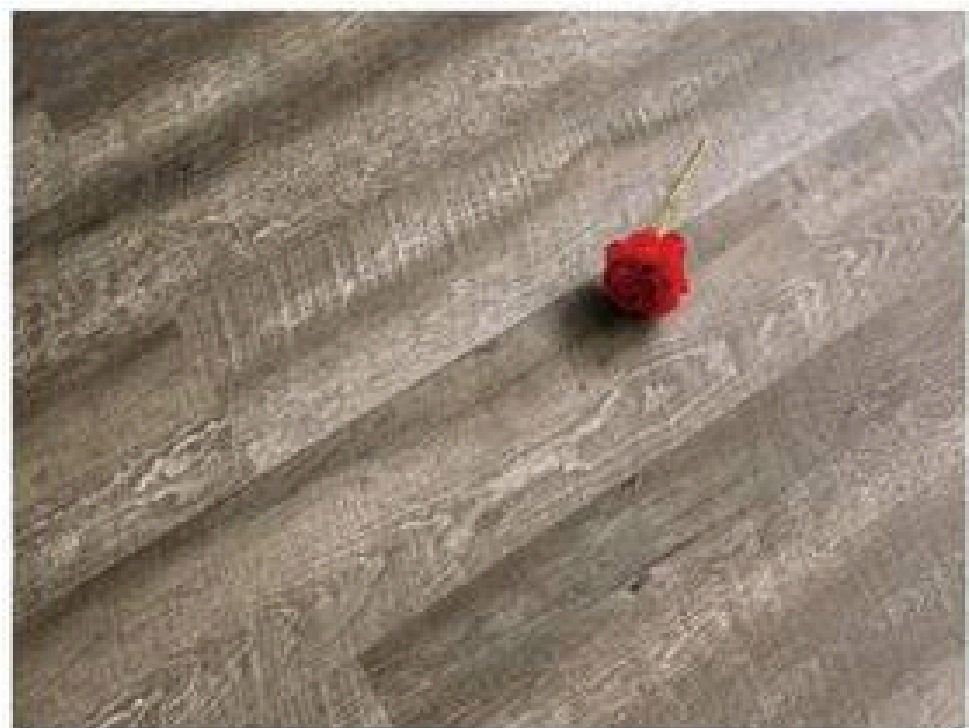

EIR is called Embossed-in-Register.

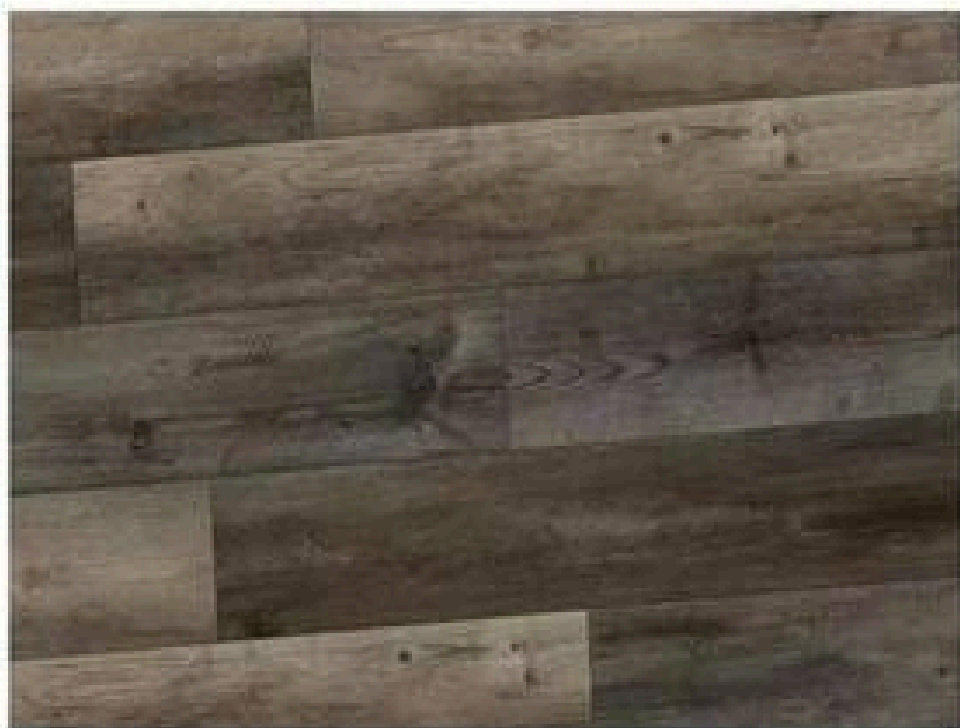

EIR manufacturing process that intensifies the depth, texture and realistic look of the flooring by aligning the embossing with the printed design.

Unlike the other textures which are commonly seen on the market—smooth, embossed (a slight texture that does not match the wood grain), and hand scraped, EIR truly create a more realistic, almost real wood! Wood look—make them much more appeal to the end users.

Right now, the EIR surface we can do:

EIR 1#

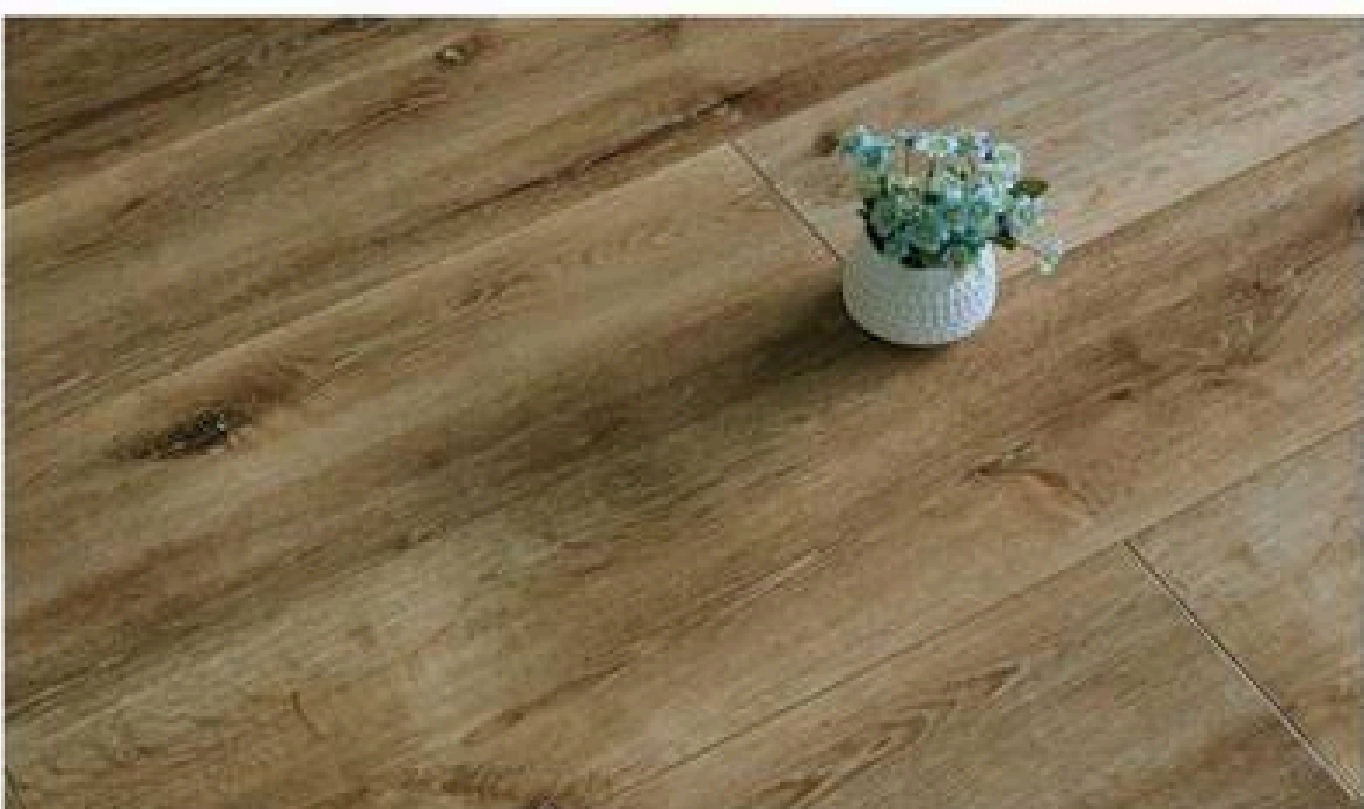

EIR 2#

EIR 3#

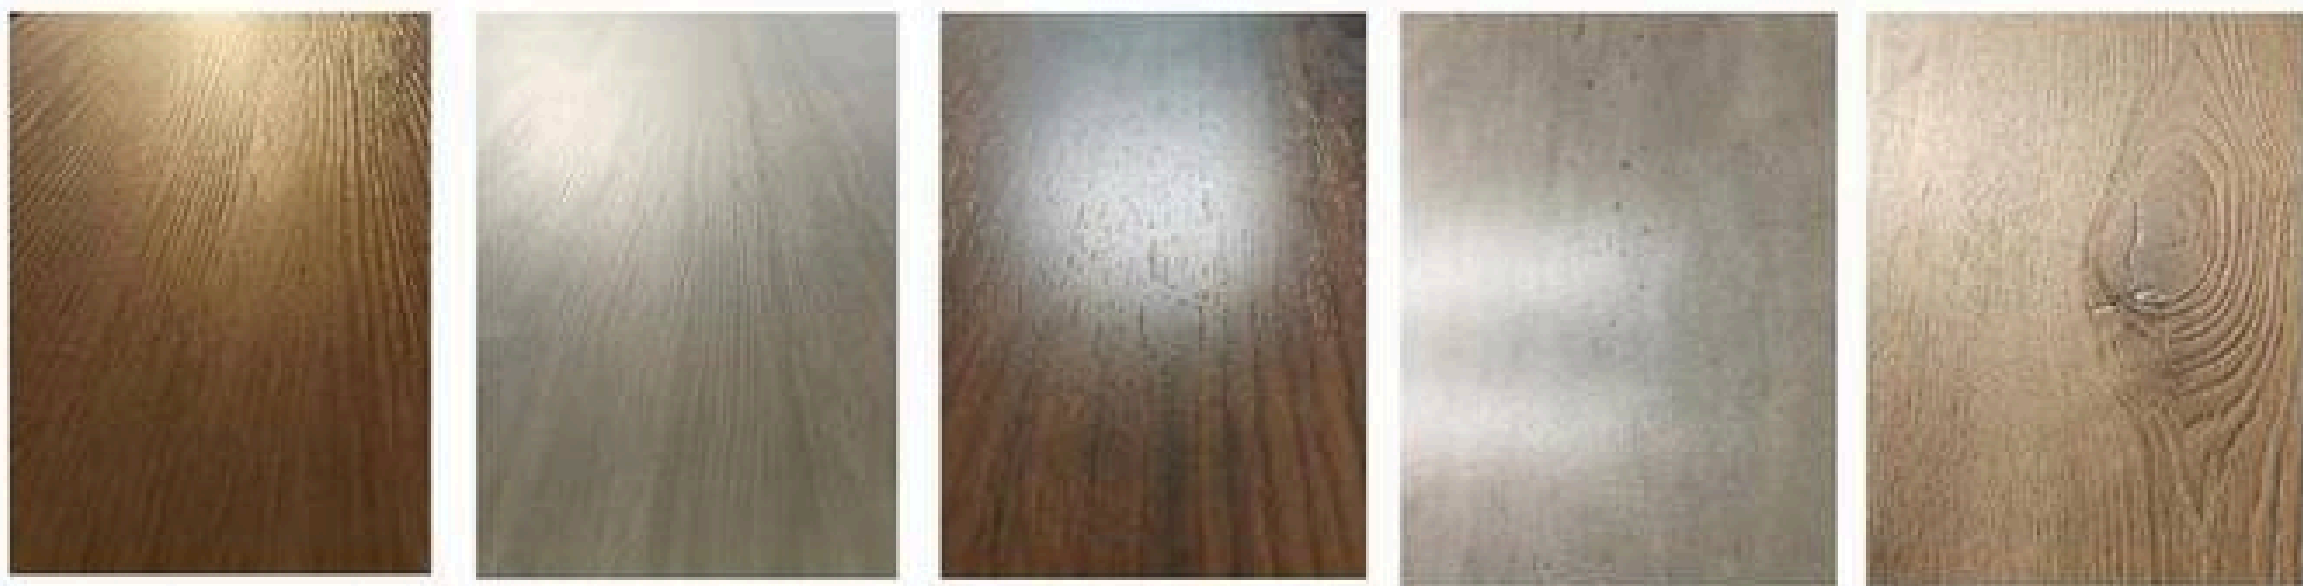

EIR 4#

EIR 5#
